CARE
 HEALTHY SOLUTIONS FOR A HAPPIER PET

Specialized diets designed with you and your pet in mind.

A few extra pounds on your dog may not seem like a cause for concern. But too much weight can be bad for his health. The good news is Diamond CARE™ Weight Management Formula for Adult Dogs can help address your dog's weight issue without leaving him feeling hungry. Powdered cellulose, a source of insoluble fiber, helps your dog feel full, while L-Carnitine aids the body in metabolizing fat. Added glucosamine and chondroitin help support joints that may be working a little harder these days. And to make sure your dog gets all the nutrients he still needs, this formula is rounded out with omega fatty acids, guaranteed antioxidants and canine-specific probiotics for digestive health. This is a complete diet, so you can feed it long-term, but always check with your veterinarian before making any changes to your dog's diet.

BENEFITS IN THE BAG

INSOLUBLE FIBER

Helps dogs feel full.

L-CARNITINE

Helps the body metabolize fat.

GLUCOSAMINE & CHONDROITIN

Help support joints.

GRAIN-FREE

As an alternative to grains, potatoes provide high-quality carbohydrates.

ANTIOXIDANT FORMULA

Guaranteed levels of zinc, selenium and vitamin E help support a healthy immune system.

GUARANTEED CANINE PROBIOTIC STRAINS

To help support digestion and a healthy immune system, each cup of Diamond CARE provides a guaranteed amount of live, active cultures of K9 Strain® Probiotics. These beneficial bacteria are developed specifically for dogs and processed under strict human-grade standards to ensure purity.

OMEGA-3 FATTY ACIDS

Omega-3s from marine sources and flaxseed help nourish the skin and coat.

SUPERFOODS

Kale, chia seed, pumpkin, blueberries, quinoa and other superfoods are particularly high in nutritional value and help provide more complete nutrition for your pet.

INGREDIENTS

150 - 175	5¾ - 6¾	6¾ - 7

Remember to keep plenty of fresh water available to your pet at all times.

CHANGING TO DIAMOND CARE WEIGHT MANAGEMENT FORMULA FOR ADULT DOGS

Changing your pet's diet should be a gradual process. Start by adding a small amount of your pet's new food to their current food. Gradually increase the new food amount and decrease the current food amount at each feeding. Continue this method for approximately one week. For sensitive dogs, extend the period to 10 to 14 days.

NUTRITION STATEMENT

Diamond CARE™ Weight Management Formula for Adult Dogs is formulated to meet the nutritional levels established by the AAFCO Dog Food Nutrient Profiles for maintenance.
