

Taste of the Wild®

HIGH PRAIRIE

PUPPY RECIPE

WITH ROASTED BISON & ROASTED VENISON

A GRAIN-FREE DIET

The balanced diet that nature intended®

Modern science proves that your puppy shares the DNA of ancient canines, like the wolf. Years of domestication and excellent care have turned your dog from a fierce and wary hunter to a trusting best friend. Although their tastes demand something of the wild, their diet should provide them with all the nutrition they need to thrive.

And that is exactly what they get with Taste of the Wild.

PASTURE-RAISED BISON & PASTURE-RAISED VENISON – Roasted bison and roasted venison provide highly digestible protein with a roasted flavor your dog will crave.

SPECIES-SPECIFIC PROBIOTICS – Healthy digestive and immune systems are vital to the overall health of your pet. Our proprietary K9 Strain® Probiotics are developed specifically for dogs and added after the cooking process to ensure viability. Each pound of Taste of the Wild provides 80 million live, active cultures that help support healthy digestive and immune systems.

SMALL KIBBLE SIZE – Small kibble size is easy for small mouths to chew, while the crunchy texture helps keep teeth clean.

DHA – This omega-3 fatty acid, provided by salmon oil, helps support brain and vision development in puppies.

DRIED CHICORY ROOT – This source of prebiotic fiber provides fuel for the beneficial probiotic bacteria in the digestive system.

ANTIOXIDANTS – Vegetables, legumes and fruits, including sweet potatoes, peas, tomatoes, blueberries and raspberries, provide nutrients that help support your dog's overall well-being while guaranteed levels of zinc, selenium and vitamin E support the immune system.
