

Taste of the Wild®

PINE FOREST CANINE RECIPE WITH VENISON & LEGUMES A GRAIN-FREE DIET

The balanced diet that nature intended®

Modern science proves that your dog shares the DNA of ancient canines, like the wolf. Years of domestication and excellent care have turned your dog from a fierce and wary hunter to a trusting best friend. Although their tastes demand something of the wild, their diet should provide them with all the nutrition they need to thrive.

And that is exactly what they get with Taste of the Wild.

PASTURE-RAISED VENISON – Venison, the number one ingredient in this formula, is rich in nutrients and energy, and a highly digestible source of protein.

SPECIES-SPECIFIC PROBIOTICS – Healthy digestive and immune systems are vital to the overall health of your pet. Our proprietary K9 Strain® Probiotics are developed specifically for dogs and added after the cooking process to ensure viability. Each pound of Taste of the Wild provides 80 million live, active cultures that help support healthy digestive and immune systems.

LEGUMES – These nutrient-dense ingredients, including garbanzo beans, peas, lentils and fava beans, are excellent sources of protein, fiber and carbohydrates.

DHA – This omega-3 fatty acid, provided by salmon oil, helps support brain and vision development in puppies, which makes it an important addition to this all life stages formula.

DRIED CHICORY ROOT – This source of prebiotic fiber provides fuel for the beneficial probiotic bacteria in the digestive system.

ANTIOXIDANTS – Legumes and fruits, including peas, lentils, tomatoes, blueberries and raspberries, provide nutrients that help support your dog's overall well-being while guaranteed levels of zinc, selenium and vitamin E support the immune system.
