

Taste of the Wild®

ROCKY MOUNTAIN

FELINE RECIPE

WITH ROASTED VENISON & SMOKED SALMON

A GRAIN-FREE DIET

The balanced diet that nature intended®

Modern science proves that domesticated cats share the DNA of ancient felines.

It's easy to see that they still share many of the same behaviors as well, like their craving for meat. Give your cat the proper nutrition it needs to thrive and feed it like the true carnivore it is, with Taste of the Wild.

HIGH PROTEIN CONTENT – 42% of this formula is protein from a unique and balanced combination of chicken meal, roasted venison, smoked salmon, ocean fish protein and vegetable protein sources. This blend provides highly digestible protein, with a rich meaty taste, for a healthy body.

SPECIES-SPECIFIC PROBIOTICS – Healthy digestive and immune systems are vital to the overall health of your pet. Our proprietary Viables® Probiotics are developed specifically for cats and added after the cooking process to ensure viability. Each pound of Taste of the Wild provides 80 million live, active cultures that help support healthy digestive and immune systems.

TAURINE – This essential amino acid is beneficial for all cats and helps to maintain healthy heart and eyes.

ALL LIFE STAGES NUTRITION – Formulated to meet the nutritional needs of your cat throughout all stages of life, from kitten to senior cat.

OMEGA FATTY ACID BLEND – Optimal levels of omega-6 and omega-3 fatty acids work together to promote healthy skin and a shiny coat.

ANTIOXIDANTS – Legumes, vegetables and fruits, including peas, sweet potatoes, tomatoes, blueberries and raspberries, provide nutrients that help support your cat's overall well-being while guaranteed levels of zinc, selenium and vitamin E support the immune system.
